SUMMARY

I am a web developer that loves the way technology affects the world. My passion is working on projects that utilize technology to help solve real problems. I stay driven by continually learning new skills and languages. Currently, I am working on learning JavaScript frameworks such as AngularJS and React.

SKILLS

PROGRAMMING LANGUAGES: Ruby, JavaScript (Ajax, jQuery), HTML5/CSS3, SASS
DATABASE AND TESTING: PostgreSQL, SQLite, Testing (RSpec, Jasmine, Capybara)
OS, PLATFORMS & SERVICES: Rails, Sinatra, Heroku, AWS S3, MS Windows, Mac OSX
OTHER: Git, Github, Agile Development, Object-Oriented Design, Bootstrap
FAMILIAR WITH: React, AngularJS, Java

PROJECTS

Yeeld

This application helps provide you with a digital way to manage your stocks, retrieve real time information, and analysis for your portfolio. The app uses various web technologies including Ruby on Rails(RoR) to manage the MVC architecture. HTML5, Sass (CSS), and JavaScript were utilized to enhance the user experience.
- Live demo -

Prism

The goal of this project was to construct a web application that analyzes an image, and creates a musical piece that matches it. This was achieved through the use of countless algorithms that take advantage of inherent traits on a given image. This project was built in Ruby on Rails, with selected pieces of jQuery and JavaScript sound libraries.

EXPERIENCE

Web Developer Training

Dev Bootcamp

Sep 2015 to Feb 2016

- Deep dive into front and back-end development using Ruby, Rails, HTML5/CSS3, and JavaScript (jQuery & Ajax).
- Co-created Prism - AWS S3 service integration, deployment to Heroku, developed audio player controls.
- Contributed to open source by putting our project on GitHub with MIT license.

Staff Accountant

Taylor Farms

Mar 2013 to Aug 2015

- Maintained integrity of general ledger by reviewing all entries before being posted; ultimately producing more accurate financial statements.
- Collaborated with team members to implement cost-benefit analysis throughout the organization which saved thousands of dollars per week.
- Analyzed sales and operations via weekly/monthly reports, respectively, to find areas of growth/opportunities, savings and customer behavior patterns.

Accounting Specialist

Taylor Farms

Mar 2011 to Mar 2013

- Created great vendor rapport by solving discrepancies, reconciling accounts, and establishing communication.
- Assisted accounting team to develop internal controls for purchasing, receiving, and accounting; the implementation improved team productivity.
- Processed high volume transactions and payments (over \$1M/week).

EDUCATION

Dev Bootcamp

Full Stack Web Developer Training

University of Illinois at Chicago

Bachelors of Science Finance

Minor - Management Information Systems
